

The legendary analog DOD Overdrive Preamp 250 is back, with over 40 years of history and experience behind it. The legendary DOD 250 captures of the classic tone and wild heart of the original but in no way tames its performance. The 250 is better than ever before with true bypass, a crisp blue LED indicator, gobs of output, and modern 9V DC power supply input. Redesigned with a lighter aluminum chassis, sleek yellow metallic flake and flat black matte bottom paint job, the DOD Overdrive Preamp pedal creates the perfect tone to carry on the legacy of DOD.

MAIN SELLING POINTS:

- Based on original DOD 250 circuit design with updated components and functionality
- True Bypass and new crisp blue LED status indicator
- Lighter aluminum chassis
